

# Windcrop, the real-time connected AG weather station

☰ Wind speed    ☰ Gusts    ↗ Wind direction    ↻ 24/7

## The simple solution to organise your work and monitor your fields as closely as possible

**Save time:** take action at the right time! **Improve your productivity:** adopt a precise, targeted approach. **Improve transparency:** access, download and save historical climate data for year-on-year comparisons.

### Precise and reliable data

- ✓ Wind speed gauge measuring **wind speed and gusts**
- ✓ **Data transmitted** every 20 minutes
- ✓ **Data sent via the low-frequency, low-speed network Sigfox**

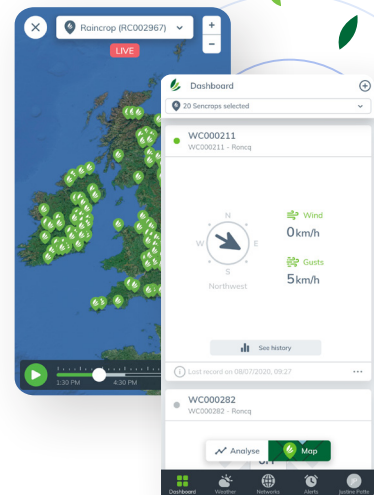

### Easy installation in your field

- ✓ **Long-life battery** lasting 2 to 3 years depending on the climate
- ✓ **Geolocation** on a map if the station is switched on
- ✓ **Two-year warranty**

### 24/7 web and mobile application

- ✓ **Online access** via your smartphone and computer
- ✓ **Real-time data** and weather forecasts
- ✓ **Create cumulative data, alerts and historical data records**
- ✓ **Compatible** with your agronomic forecasting models

## The largest network of stations in Europe

- ✓ **20,000 stations installed**
- ✓ **Access to other stations** in the Sencrop network
- ✓ **Compare weather data on neighbouring plots**
- ✓ **Personalised customer service** 5 days a week
